

V. International Ege Composite Materials Symposium 2020

- Production and characterization of composite materials
- Industrial applications of composite materials:
 - Composites used in packaging industry
 - Leather and leather-derived composites
 - Composites used in construction industry
 - Composites used in automotive industry
 - Technical textiles
 - Composite structural materials
 - Airspace Technology
 - Defence Technology
- Nanocomposites
- Biocomposites
- Polymeric composites
- Metal matrix composites
- Ceramic matrix composites
- Sandwich materials/hybrids, Multifunctional composite, Advanced composites
- Recycling and sustainability of composite materials
- Financial and economic analysis of composite materials
- Composite material market
